

## Risk Management Scorecard: Perinatal Services

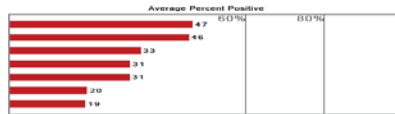

### Culture of Safety

#### Facility Report Card

Pascal Metrics calculated scores for each work setting based on their survey responses to each of the 33 questions and 7 domains on the SAQ. The following figures present those scores and the bars are colored in order to indicate whether those scores put the facility in the danger zone (red), middle zone (yellow), or goal zone (green).

#### Roll-up: Domain Scores

Stress Recognition  
Job Satisfaction  
Perceptions Of Local Management  
Teamwork Climate  
Safety Climate  
Working Conditions  
Perceptions Of Senior Management

### Incident Report Trends

	Baseline Monthly	Current month	Months at Target	Threshold >10%	Target 15%	Max 20%	Outcome
Clinical	24	27	0	26	28	29	Threshold
Med Safety	35	42	7	39	40	42	Max
Commun	13	5	0	14	15	16	Threshold
Delay	13	2	2	14	15	16	Threshold
Near Miss	27	14	1	30	31	32	Threshold

FY 14 Goal: 6 months at target or above

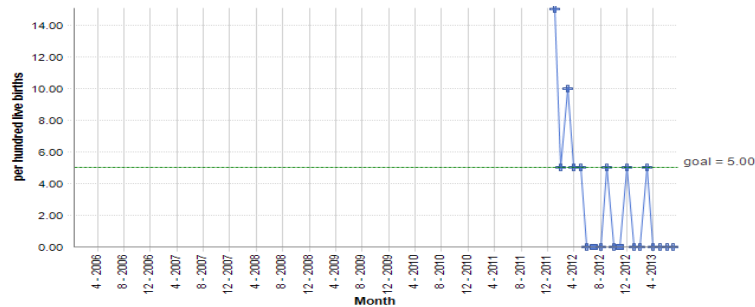

### Quality

PN Core Measures	July - Sept 13	Goal	SCIP	July - Sept 13	Goal
Elective Delivery	89.3	94.0	Hair removal	100.0	95.0
Cesarean Section	98.8	97.0	VTE ordered	100.0	93.0
Antenatal Steroids	89.7	89.0	VTE timing	92.4	75.0
HC Assoc BSI	92.3	50.0	Post op Normotherm	89.4	95.0
Exclusive BF	100.0	95.0	Urinary Cath	95.2	90.6

### Patient Satisfaction Scores

### Perinatal Trigger Measure: Harm

### Contributing Factors: Claim Frequency
